

Steps to 2x2 Prioritize

1. Find your centerline. You are effectively deciding which stickies belong in the top 2 quadrants, and which are the bottom.

2. Start from the top, move the sticky left or right based on feasibility.

Tips

- Just like a stack rank, things can move.

- Try not to create lines of stickies

- It's okay to be unsure. The discussion is the important part. (remember you can throw it away if it doesn't stick)

Dots for Final Voting
