

## HMW Stickies

## Rejected Sticky notes :!)

## Steps to Stack Rank

1. Get rid of your all encompassing or too narrow stickies.
2. Find a middle of the road sticky (not really a digital solution, or mediocre user value) [this can change].
3. Place your middle of the road sticky in the middle of the stack rank line.
4. Evaluate each sticky off the existing line up.
5. Things can move and rearrange.

## High User Need

## Low User Need

## Steps to 2x2 Prioritize

1. Find your centerline. You are effectively deciding which stickies belong in the top 2 quadrants, and which are the bottom.

2. Start from the top, move the sticky left or right based on feasibility.

### Tips

- Just like a stack rank, things can move.
- Try not to create lines of stickies
- It's okay to be unsure. The discussion is the important part. (remember you can throw it away if it doesn't stick)

## Dots for Final Voting
